Customize Systems

Combination System

Features :

- ◆ This system combines auto carton sealing machine with fully-auto strapping machine to meet the customer's needs and reduce labor costs. Design of combining these two machines together makes the job done in one process.
- ◆ Providing continuous sealing and strapping offers cost effective and reliable quality, is easy to operate and maintain.
- ◆ Carton sealing machine and strapping machine can be used separately.
- ◆ All-in-One design for the main head is solid and durable.
- ◆ The Aluminum Arch is specified for small cartons. The strapper can precisely strap at the requested position.
- ◆ The brush guiding mechanism ensures the strapping at the proper position and not to slant. Brilliant performance.
- ◆ Patent tapping head prevents the OPP from folding and makes the carton sealing smoother. Furthermore, the machine also installs two or more sets of sensors to meet the strapping needs.
- ◆ Its cushiony construction will reduce vibration while sealing cartons.
- ◆ 60 seconds auto-stop device will reduce unnecessary consumption and costs.
